

Teddy Bears' Picnic

Programme outline

EYFS Foundation / Key Stage 1

-  A highly imaginative programme providing an exciting series of activities to help children learn the Needs of Life for all living things.
-  During the morning discover the secret of SWAF through a story and some energetic games, followed by a special Earthwalk using all our senses in the natural world.
-  At lunch set off on a trail to find the missing teddies and learn how they have been helped in their survival by the plants and animals of the woods.

-  After a picnic, create a miniature woodland island for the teddies, complete with shelter, water air and food (SWAF).

Curriculum links

Understanding the world: making sense of the physical world and local community through play and exploration; exploring, observing and finding out about people and the environment.

Science: exploring ways of looking after living things and keeping them alive and healthy; investigating the local environment and using findings to inform actions to care for it.

Geographical and social: developing knowledge about the UK and the wider world; using geographical skills, including first-hand observation, to enhance locational awareness; understanding how people, communities and places are connected and can be interdependent.

About us...

Cathy Mayne and Anna Stevens have worked in environmental education for many years both with the Avon Wildlife Trust and other environmental organisations and have been tutors for Environmental Education programmes at Folly Farm since 2001. They have also been involved with primary schools across the region delivering a range of activities encouraging wildlife awareness amongst children and adults alike.
